

Payment Microservice

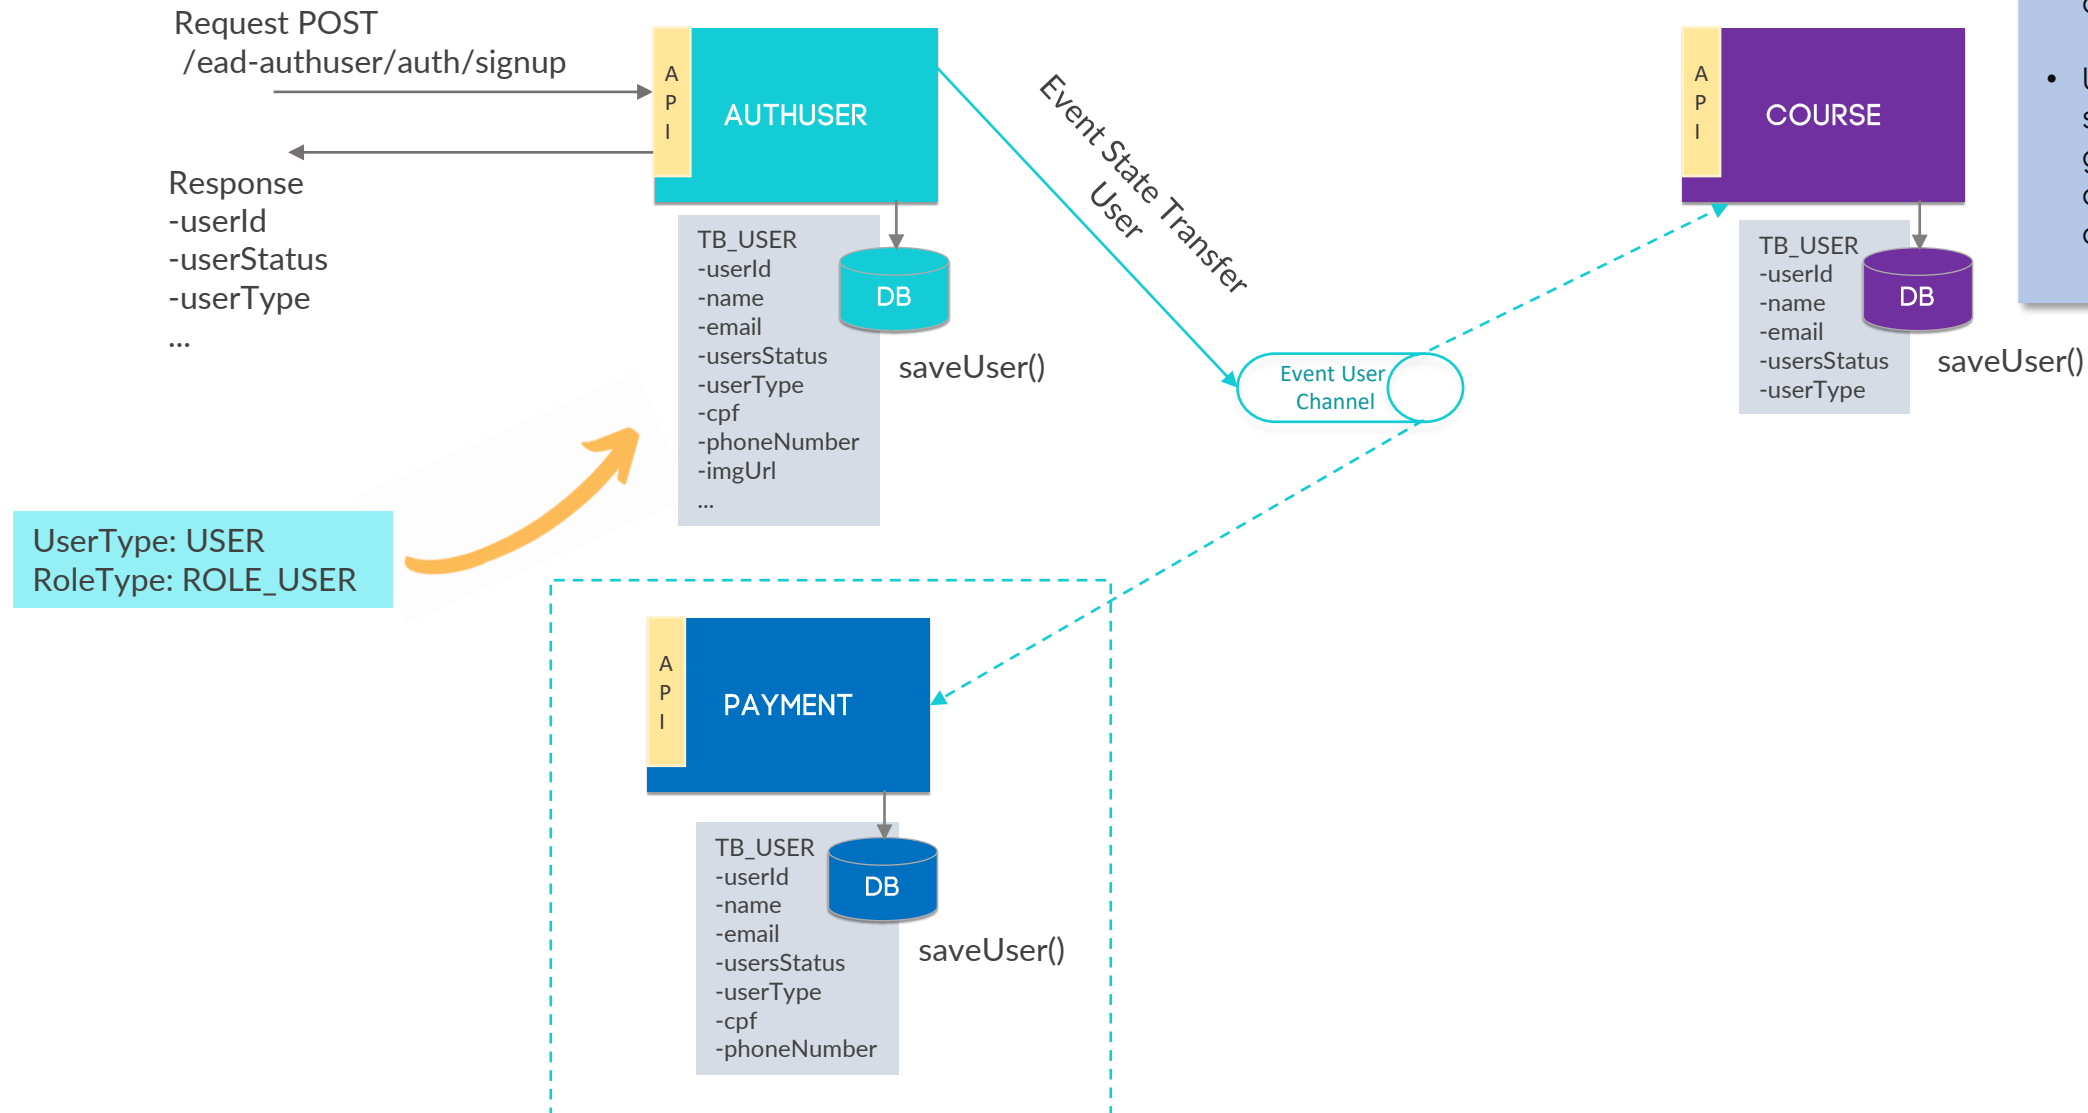

EAD with Payment Microservice

- API;
- Autenticação e Autorização com Spring Security;
- Registro no ServiceRegistry;
- Conexão com ConfigServer;
- Base de dados por Microservice;
- ...

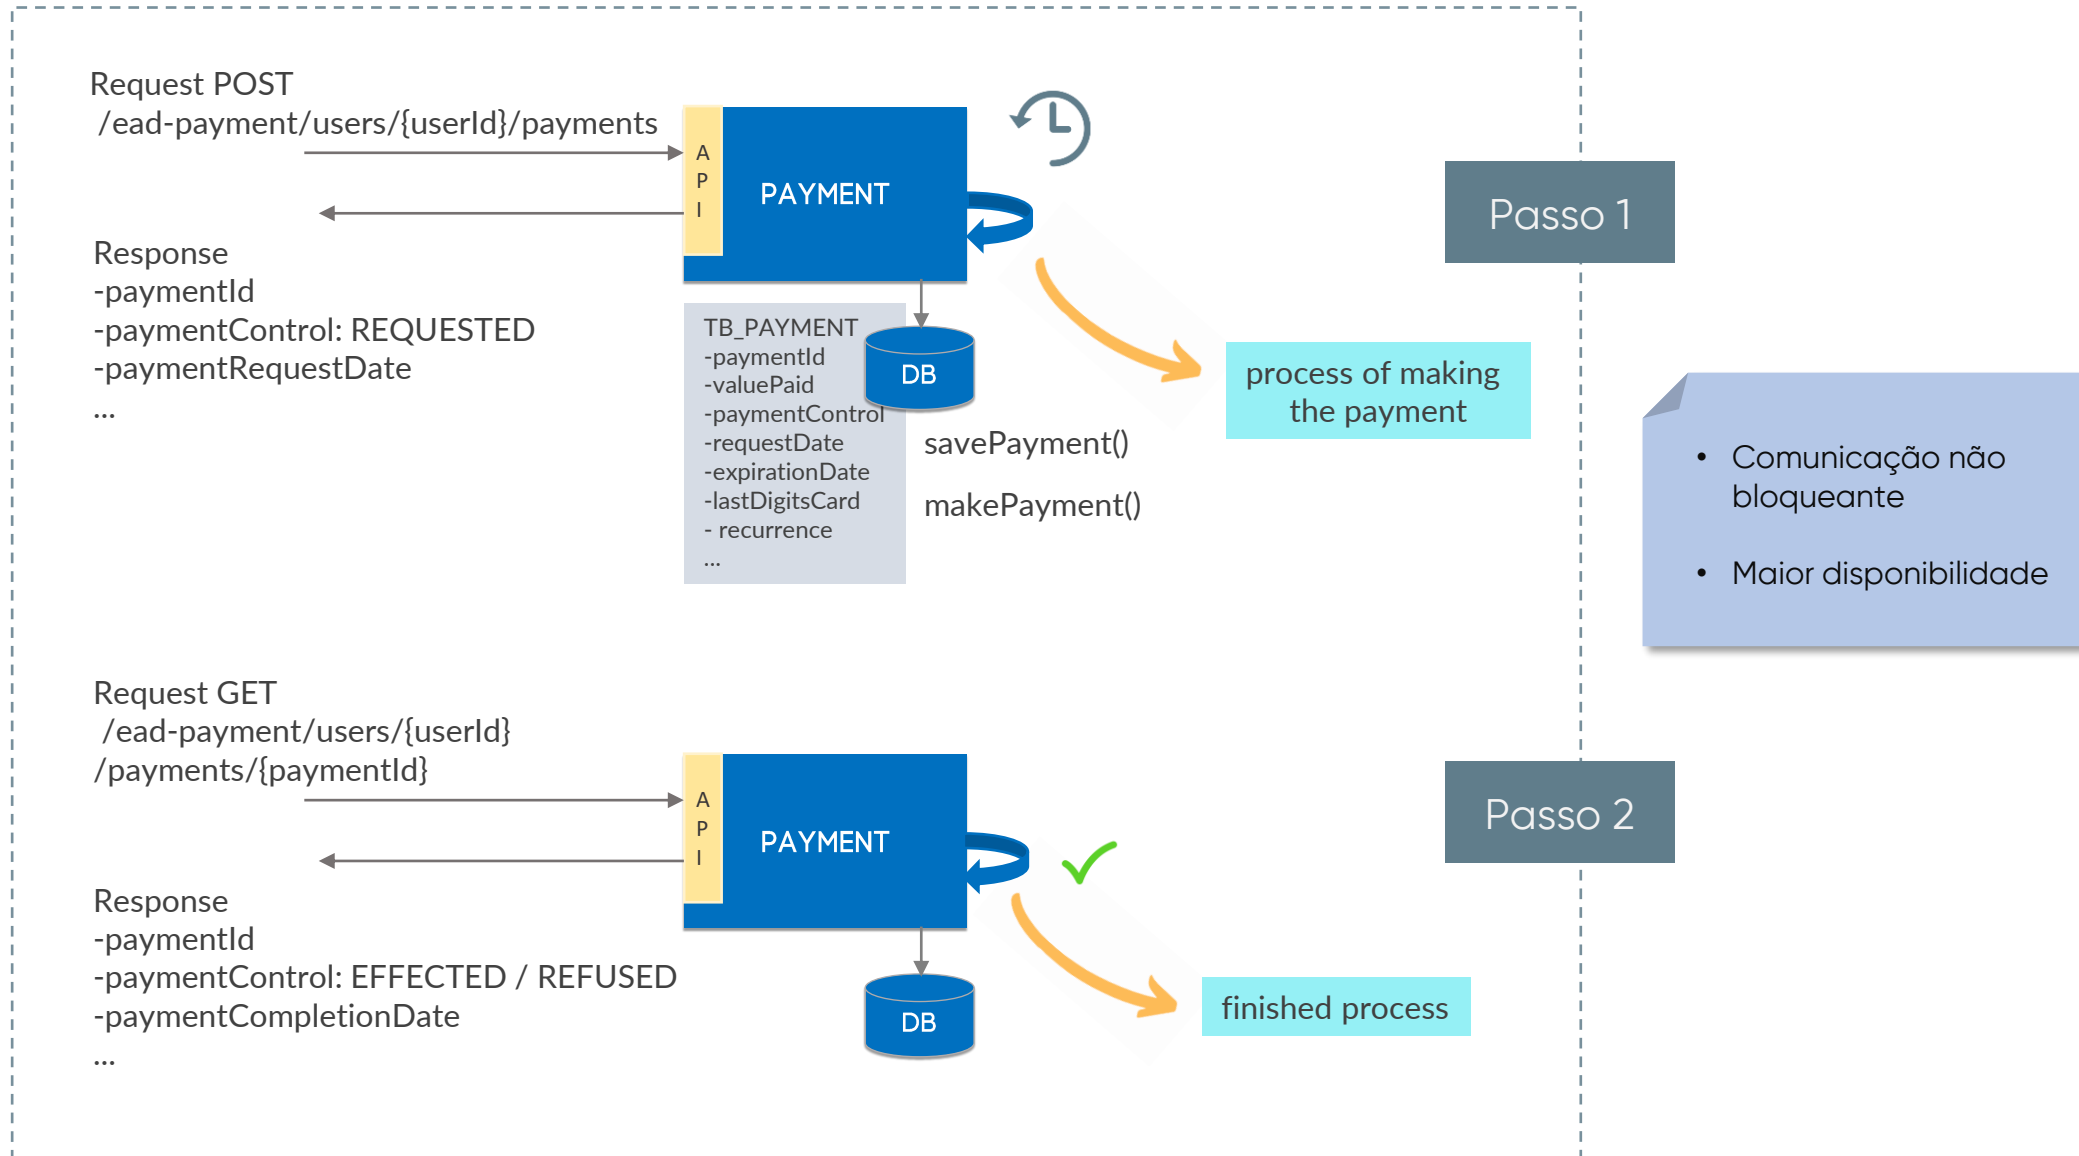

EAD Architecture with Payment Microservice

Flux create new user - State Transfer

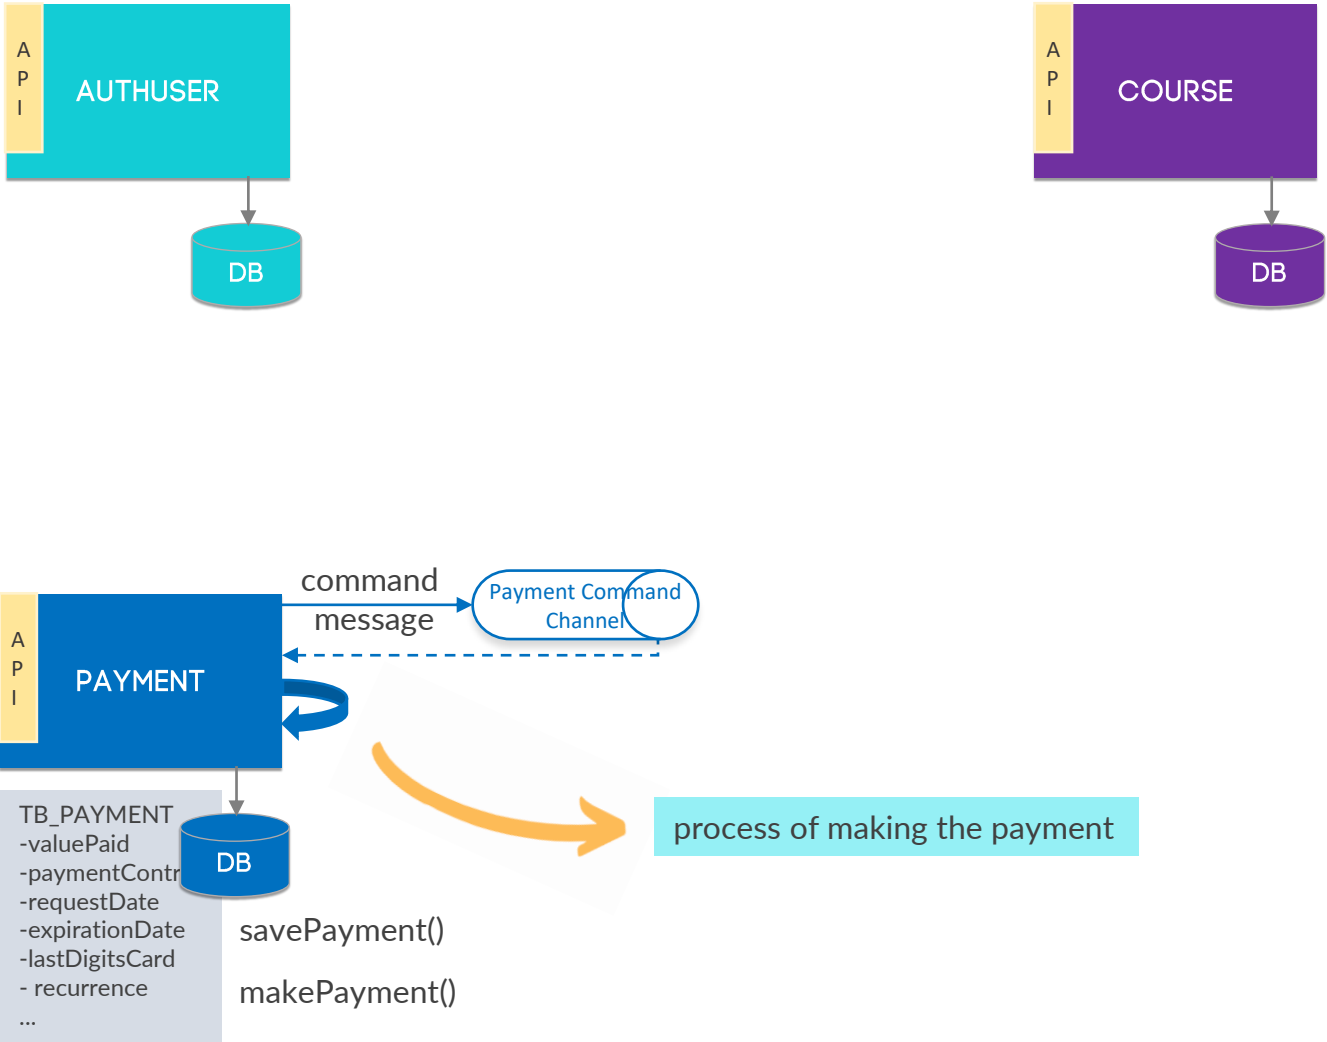

- Com Event State Transfer podemos manter a consistência dos dados pela arquitetura.
- Uma melhoria futura seria criar Courses gratuitos onde os users do tipo USER teriam acesso.

Flux make payment - Asynchronous Communication via API

Flux make payment

Flux make payment
